# Scientific Programme

The Scientific Programme is coming together nicely and we already have a number of exciting sessions taking shape. These include two keynote speakers (to be announced soon!), the “never-to-be-missed” Regulatory Session, a presentation from last year’s RSS/PSI prize winner Sandeep Menon on Application of Digital Medicine in Drug Development, plus sessions organised by a variety of our Special Interest Groups.

With three days of live content, access to on-demand material and opportunities to network, it is worth setting aside time in your calendars now in order to attend.

### A message from the Conference Chair...

Based on my experience from previous years, I anticipate (with great excitement) the range of topics that are covered from contributed abstracts. It is always great to see the variety of excellent work that exists within our industry.
